

# **HYPERLINK**

---

**For Immediate Release - November 3, 2021**

**Edmonton, Alberta, Canada**

Hyperlink, a leading commercial grade satellite antenna manufacturer based in Canada, is pleased to announce significant global orders in the third quarter of 2021.

Value-added reseller sales include shipments to Netherlands, Slovakia, and Oman, destined for oil and gas end-users. With several large-orders pending, Hyperlink continues to gain momentum in the international VSAT marketplace.

"While supply chains remain challenging, we made a big investment to ensure we have great stock of our legacy VR7 antennas, and we are very excited about our NXT product, launching in early 2022", notes Hyperlink President and CEO, Brad Adam.
